PQA POSITION DESCRIPTION

Title: Research Associate

Supervisor: Senior Director, Research

FLSA Classification: Full time; Exempt

Location: Remote / Alexandria, VA (flexible)

OVERVIEW

PQA, the Pharmacy Quality Alliance, is a national quality organization dedicated to improving medication safety, adherence and appropriate use. A measure developer, researcher, educator and convener, PQA’s quality initiatives support better medication use and high-quality care. A non-profit organization with approximately 250 diverse members across healthcare, PQA is a unique alliance in healthcare. It brings pharmacies, health plans, health care providers, pharmacy benefit managers, biopharmaceutical companies, technology vendors, government agencies and others together to build consensus and collaborate to improve medication use quality.

The Research Associate supports PQA’s research efforts to develop evidence to support meaningful quality measures; demonstrate the value of medications and pharmacist-provided care; and foster collaboration within the healthcare system to address social determinants of health and improve medication access. To improve quality of care, PQA research also evaluates innovative care delivery models, and engages with patients to bring the voice of patients into research.

The Research Associate will support the Senior Director of Research and members of the Research Team by providing analytic support such as designing research projects and analytic plans; analyzing qualitative and quantitative data; interpreting findings; producing effective data visualizations; and participating in dissemination activities. Other activities of the Research Associate may include supporting environmental scans, literature reviews, evidence synthesis, and providing support for PQA’s learners program.

As part of the Research Team, the Research Associate will also support other teams within the organization including Performance Measurement and Education, Engagement, and Convening. The Research Associate will collaborate with PQA staff to ensure that the organization’s research is aligned with PQA’s mission and organizational priorities, responsive to the needs of PQA’s multi-stakeholder membership, and effectively disseminated to members and other relevant health care stakeholders.

RESPONSIBILITIES:

- Support PQA Research and Analytics
  - Support quantitative and qualitative research projects including protocol design, timely project execution, and dissemination activities
  - Design questionnaires and semi-structured interviews
  - Contribute to the examination of disparities and the influence of social determinants of health
health

- Draft study designs and statistical analysis plans, conduct analyses, and provide interpretation of results including data visualizations
- Manage quantitative data in SAS including large administrative claims datasets and qualitative data in Dedoose
- Develop content to support clinical, technical, and analytic deliverables, including interim and final reports, literature reviews, and environmental scans

- **Support PQA Stakeholder Engagement**
  - Participate in dissemination activities including speaker presentations, poster presentations, webinars, peer-reviewed publications, and blogs
  - Maintain and further strategic relationships with external researchers, PQA members, and other healthcare quality stakeholders

- **Support Project Management and Professionalism**
  - Utilize PQA business management resources to track project timelines and facilitate effective and appropriate internal communications
  - Work collaboratively across all PQA teams to ensure cohesiveness and communication
  - Ensure adherence to professional standards and research ethics
  - Maintain broad and current knowledge of issues related to healthcare quality, health policy, and effective medication use and safety, as well as quality measurement

**QUALIFICATIONS AND EXPERIENCE:**

**Required**

- Education: Master’s degree or higher in a health-related field
- 3+ years of conducting mixed-methods healthcare research
- Proficiency in statistics and with statistical analysis software (e.g., SAS), qualitative analysis software (e.g., Dedoose), and data visualization software (e.g., Tableau)
- Demonstrated analytical skills with ability to derive and effectively communicate important implications to a variety of audiences
- Proficiency in the Microsoft Suite of applications, including Word, Excel, Outlook, SharePoint, and Teams

**Preferred**

- Proficiency in conducting literature reviews using scholarly databases
- Experience with qualitative and quantitative research designs including survey and structured interview development
- Familiarity with pharmacy and healthcare system landscape and performance measurement to advance the mission of PQA
- Experience with projects focused on patient-centered outcomes and/or patient-reported outcomes
- Demonstrated usage of healthcare claims databases

**The ideal candidate should also have:**

- Strong verbal and written communication skills.
- Highly organized, efficient and detail-oriented processes.
- Ability to perform independently and adapt to new tasks in a fast-paced environment under general supervision.
- Collaborative and supportive mindset.
